NEW MACHINES REACH KOLKHOZES;  
OTHERS GO INTO PRODUCTION

Recently, Rostsel'mash (Rostov-On-Don Agricultural Machinery Plant) dispatched a trainload of Stalinets-6 combines to the Stalingrad Oblast. Two more such train loads will be sent to Stalingrad by the end of May.

Rostsel'mash is about to begin production of a new roller-type haymower. Several models of this machine are currently in the process of testing.

Large shipments of agricultural machinery are arriving daily in the MTS and kolхозes of the Kirgiz SSR. Thirty garden and orchard tractors with trailing equipment have just been delivered. This type of machinery will be tripled by the end of the year.

The number of self-propelled combines will be increased several times this year and will include 50 Stalinets-6 combines. This autumn, the plantations will receive 130 cotton pickers.

The MTS are being equipped with tractor rakes, self-propelled haymowers, mechanical graders, tractor scrapers, etc. In the approaching harvest of grains and hay, the kolkhozes will, for the first time, employ mechanical hay stackers.

**ARMENIAN KOLKHOZES WORK WITH MODERN MACHINERY -- Kommunist, 28 May 50**

Talinskiy Rayon (Armenian SSR) had not a single piece of agricultural machinery prior to the establishment of its MTSs. Now, tractors, seeders, and combines are a familiar sight in its kolkhozes. Within the past 2 years, the MTS have been equipped with caterpillar STZ-NATI and DT-54 tractors. This year, for the first time, powerful Stalinets-6 combines will be working in the fields.

**CALLS FOR ADDITIONAL OUTPUT -- Pravda Vostoka, 2 Jun 50**

To celebrate the opening of the session of the Supreme Soviet USSR, the Samarkand Repair Plant has decided to complete the half-year plan by 12 June. By that date, the plant will also begin to produce five new tractor parts for the use in the Uzbek MTSs; two of these are about to go into production.

**EXCEEDS NORMS, TURNS OUT NEW PRODUCTS -- Sovetskaya Estoniya, 23 May 50**

The Rakvere "Ader" Plant has turned out 217 plows and 552 hillers for the Estonian republic's needs during the past 4 months. The plant will greet the republic's 10th anniversary by completing the 9-month program. It has already exceeded the April norm.

Currently, the Ader Plant is preparing for the production of a new type of plow for reclamation purposes.

**CHAIN-MAKING PLANT TOPS MONTH'S NORM -- Izvestiya, 1 Jun 50**

The Kiev "Tsepi Gallya" Plant, which produces combine chains, has completed the May plan a week ahead of time.

**FINDS WAYS TO SAVE METAL -- Leningradskaya Pravda, 21 May 50**

At the Plant imeni Karl Liebknecht, Designer Kuzin has devised a new pattern for cutting the spirals of the ventilator hood of the cotton-picking machine, which will yield an annual saving of 6 tons of steel.

The plant has also introduced new norms for the consumption of rolled metal. As a result, there is a saving of 7 percent in metal for every gasoline engine and every Pioneer sprinkler produced.

**UKRAINIAN ACADEMY GETS NEW INSTITUTE -- Komsomol'skaya Pravda, 26 May 50**

The Academy of Sciences Ukrainian SSR opened a new institute today in Kiev. Its official name is the Institute of Mechanical Sciences and Agricultural Mechanics.
